## PROFILE

Software Developer with 3+ years building scalable .NET/Java backends and modern web frontends (Vue/React/Angular). Experience across IoT, e-procurement and live broadcast systems, with a focus on refactoring legacy services, improving reliability and deploying containerized, Azure-based solutions using CI/CD and DevOps practices.

---

## WORK EXPERIENCE

- |                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Jun 2026 – Sep 2026 | <b>IT Consultant - Full Stack Developer, Hays (Client: Schröder Hyperion)</b> <ul style="list-style-type: none"><li>• <b>IoT Services &amp; Configuration:</b> Engineered C#/.NET backend services for 20,000+ street-lights, cutting commissioning time, reducing device failures and simplifying support with centralized firmware and device-twin management.</li><li>• <b>Data &amp; Messaging:</b> Designed data and messaging flows with MongoDB and RabbitMQ, increasing reliability and observability across distributed IoT services.</li></ul>                                                                      |
| Jul 2024 – May 2026 | <b>IT Consultant - Backend Developer &amp; Scrum Master, HN Services Portugal (Client: VORTAL)</b> <ul style="list-style-type: none"><li>• <b>Refactoring &amp; Maintenance:</b> Led refactoring and development of complex C# and Java backend services for the e-procurement platform, reducing legacy-related production incidents and support tickets by ~20–30% and improving scalability.</li><li>• <b>Agile Leadership:</b> Served as Scrum Master for a cross-functional team, streamlining Agile ceremonies and aligning with DevOps practices to increase deployment frequency and application stability.</li></ul> |
| Jul 2023 – Jun 2024 | <b>Software Developer, wTVision</b> <ul style="list-style-type: none"><li>• <b>Containerized Deployment:</b> Built real-time graphics and data processing solutions for the UEFA Champions League using .NET Core and Docker, ensuring consistent and reliable deployments from development to production.</li><li>• <b>High-Availability Monitoring:</b> Designed monitoring and telemetry systems that delivered zero-failure live broadcasts across dozens of high-stakes sports matches and national electoral events.</li></ul>                                                                                          |
| Mar 2023 – May 2023 | <b>Junior Full-Stack Developer, Browser S.A.</b> <ul style="list-style-type: none"><li>• <b>Backoffice Development:</b> Built data-driven backoffice applications for a major transport company using ASP.NET 6, Dapper and Azure, streamlining data processing in key modules and making daily logistics operations noticeably more responsive for the internal team.</li></ul>                                                                                                                                                                                                                                              |
